

All-in-One Control Center

Customizable touch-screen phone with access to alarm clock, message center, and room control

The Life|point® InTouch phone is a tabletop VoIP touch-screen telephone that works with Life|ware Hospitality Solutions to provide unmatched flexibility. The phone's easy to use touch-screen interface is fully customizable, giving your guests instant access to a variety of convenient features and information.

Features

- Telephone features such as voice mail, speakerphone, two-line calling, and recent calls
- Time and date, current weather, and multi-day forecasts
- One-touch hotel directory for instant access to hotel services
- Dual alarms and sleep timer with programmable wake to sounds, lights, TV, music, and climate
- Hotel-branded messaging and reminders
- Manual and preset room lighting and climate control
- Music via portable music devices

The tiltable display panel has a 7-inch, full-color touch screen and convenient raised buttons for Snooze, Alarm Off, and Volume. The side panel offers 3.5mm stereo and RCA audio jacks to connect portable music devices, plus a USB port and a 2.5mm headset jack for connecting ADA devices such as an ADA-compliant headset or TTY keyboard.

Combining the functions of a telephone, alarm clock, message center, music dock, and room control, the Life|point InTouch phone is a multipurpose control center.

HIGHLIGHTS:
