

Keypads & Controls

The LifePoint from Exceptional Innovation is the company's new companion user interface for its LifeWare Home Network systems. The touchpanel features a 16:9 aspect ratio along with an 720p screen resolution, and it can be used to control everything from lighting and HVAC to home security and home entertainment systems. The touchpanel's programming utilizes technologies that prevent its software and settings from being manipulated. It streams information entirely in the digital realm. **MSRP varies from \$6,000 to \$8,000 depending on size.**
