LIFEWARE ANNOUNCES SUPPORT FOR CENTRALITE LIGHTING

Centralite embraces Web Services for Devices to achieve complete compatibility.

Columbus, OH – April 11, 2006 – Exceptional Innovation, makers of Lifeware™, hardware-friendly home control software, today announced Lifeware home control solution compatibility with Centralite lighting products.

“Lifeware supporting Centralite, brings together two great companies offering industry-leading products,” said Mike Seamons, Exceptional Innovation’s Vice President of Marketing.

“Centralite spotlights the digital lifestyle Lifeware provides.”

Lifeware is seamlessly integrated into Microsoft Windows® XP Media Center Edition 2005. Using the same Media Center remote they use to access and enjoy their music, movies and photographs, a Lifeware user can now easily control Centralite dimmers and lighting scenes.

“Lifeware is an easy-to-use and elegant home control solution that complements Centralite perfectly,” said Mike Dow, Executive Vice President of Sales and Marketing for Centralite Systems, Inc. *“We are pleased and excited to be working with such an innovative product like Lifeware.”*

Lifeware leverages Web Services for Devices standards to be hardware-neutral, an approach that allows dealers to offer their customers more choices among available systems, and gives them the flexibility to create unique new offerings to expand their business.

Pricing for Lifeware 1.0.1 will vary based on installation and scale. EI will also create custom and premium versions for custom installers.
